Close

- ▶ Show NppFTP Windows

Plugins > NppFTP > Show NppFTP Windows

- ▶ Profile Settings

Settings > Profile Settings

► Add New Profile

The image shows a 'Profile settings' dialog box with a close button (X) in the top right corner. On the left, there is a 'Profiles:' list containing one entry, 'nt-lab', which is highlighted. Below this list are four buttons: 'Add new', 'Rename', 'Copy', and 'Delete'. The main area of the dialog is divided into tabs: 'Connection', 'Authentication', 'Transfers', 'FTP Misc.', and 'Cache'. The 'Connection' tab is active and contains the following fields:

- Hostname:** 172.25.1.111
- Connection type:** SFTP (dropdown menu)
- Port:** 22
- Username:** somchai
- Password:** A field with six dots, followed by an unchecked checkbox labeled 'Ask for password'.
- Timeout:** 30
- Initial remote directory:** /home/somchai/bin

At the bottom right of the dialog is a 'Close' button.

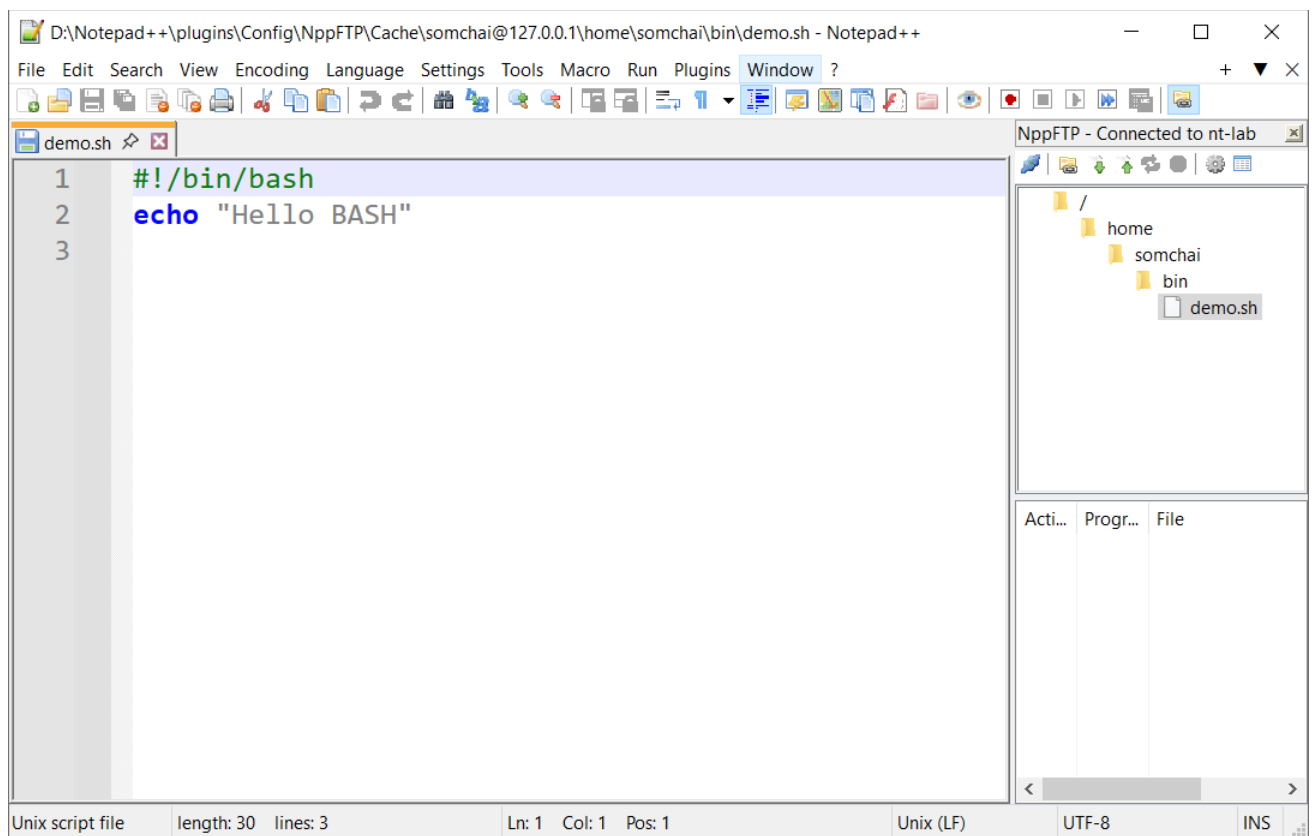

Create file

- ▶ Server

```
cd
touch bin/demo.sh
chmod +x bin/demo.sh
```

- ▶ Notepad++ (อาจต้องเลือกภาษา Language > S > Shell)

Profiles > nt-lab > demo.sh

- ▶ Server

demo.sh

Hello BASH

Cisco Syntax

- ▶ download file
